ID	Name	CGPA	Session
1	Jackson	3.56	Fall-17
2	Ronald	3.84	Spring-16
3	Jemmy	3.96	Fall-17
4	Sara	2.88	Fall-17

Query

1. Create a view **vStudentInfo** that will contain id, name, session
2. Update session spring-**15** where ID is 3.
3. Delete from **vStudentInfo** where name is sara and session is Spring-16.
4. Insert another record containing information (5, 'Ratul', 3.88, 'Spring-15').
   a. Note: use **vStudentInfo** to insert the information.
   b. Use main table if required but without using id, name, session for condition.
5. Modify the view name to vStudent.
6. Drop the view vStudent but keep the record to another view vSTD

ID	Name	Gender	DepartmentID
1	Jhon	Male	3
2	Mickey	Male	2
3	Ronald	Male	1
4	Sara	Female	4
5	Michel	Male	1
6	Smith	Male	3

DeptId	DeptName
1	IT
2	Payroll
3	HR
4	Admin

1. Create a view **vEmployee** that will contain id, name, deptId, deptName.
2. Delete the employee where name is sara using **vEmployee**.
3. Add the employee Sara using **vEmployee**. as you accidentally delete .
4. If any information missing in main table take necessary step to add.
5. Delete the department **Admin** from department table.

6. Update the deptName of John to IT by any means you can, but don't make any false info.
7. Remove the deptId from **vEmployee.**
